## Vacuum Filters

## Vacuum Filters MTF

## Introduction and application

- It is widely used in vacuum systems for industrial applications to effectively prevent solid particles or dust from being sucked into vacuum pumps or systems, reducing pump wear and tear, improving pump operation reliability, extending pump life, and effectively protecting components of vacuum systems. (such as vacuum valves, vacuum meters, etc.).
- All steel structure, sturdy and durable, suitable for heavy load requirements for industrial use, seamlessly stretched metal casing with copper welded joint, high air tightness, large volumetric space, easy to clean, easy to replace filter element, fast import and export Threaded connection, special nozzle can be matched according to customer's requirements, O-ring seal is used, the maximum vacuum value is less than 1Pa standard configuration paper filter, the filtration precision is 99\% (10 micron particles). Passing gas temperature: -15 to 90 degrees.

## Ordering Data Vacuum Filters MTF

| Type | Ordering Data |
| :--- | ---: |
| MTF002 | 90.08 .01 .00001 |
| MTF002-1 | 90.08 .01 .00002 |
| MTF004 | 90.08 .01 .00003 |
| MTF003 | 90.08 .01 .00004 |
| MTF006 | 90.08 .01 .00005 |

## Technical Data Vacuum Filters MTF

| Type | Rated flow $\mathrm{m}^{3} / \mathrm{h}$ |
| :--- | ---: |
| MTF002 | 32 |
| MTF002-1 | 42 |
| MTF004 | 100 |
| MTF003 | 120 |
| BF006 | 300 |
